

Learning Snapshot!

Essential Questions:

Everytime we enter a new unit, we ask ourselves essential questions that we must answer before we end. This helps us to wrap our heads around the big idea of the unit.

Math

Starting on Monday, we will begin our new unit in addition and subtraction using numbers from 1-1000. So far we have been working on increasing and decreasing patterns and numbers. We will start off reviewing and finding out new information about place value.

Essential Questions: What strategies can I use to solve problems with large numbers?

Social Studies

Geography and Landforms in India, Ukraine, Tunisia, and Peru

Essential Questions: How can I use a map to help me understand God's World? How does geography impact the way people live?

English Language Arts

On Monday, we are going to be taking all our hard work on generating ideas and we will begin to write. *Then, we are going to read, then write, then write some more, then read, then write even more!* Building stamina is important and from now until Christmas we will be having a hard focus on writing amongst the regular word work and grammar/phonics work that we do.
